ECONOMIC INDICATORS		
Economy	A remote country of 33 scattered coral atolls, Kiribati has few natural resources and is one of the least developed Pacific Islands. License fees paid by Foreign Vessel for fishing in the vast EEZ is a major source of income to the country. Copra and fish now represent the bulk of production and exports. Economic development is constrained by a shortage of skilled workers, weak infrastructure, and remoteness from international markets. The country is particularly seen as vulnerable to effects of rising sea levels.
